**Pro Laminat –  
for People and the Environment**

In Harmony with Nature, Natural  
and Supportive of Healthy Living

## Transparent Environmental Footprints

To make it simple and straightforward for customers to compare lifecycle analyses and environmental impacts of products, we have committed ourselves to total product transparency. We use Environmental Product Declarations (EPDs) to openly communicate the environmental footprints of our wood-based materials.

## Sustainability and Quality

Every one of our products offers you excellent value for money – plus outstanding environmental benefits. KRONOTEX laminate floors meet the highest expectations with regard to quality and eco-friendliness: they are made using only raw materials from sustainable managed forests, their manufacture is strictly monitored, and their use and ultimate disposal minimize environmental burdens.

## EPDs – for the Environment’s Sake

Germany’s Institute for Construction and Environment (IBU) issues EPDs which were developed in close collaboration with German construction and environmental authorities and international standards organisations.

## Healthy Living

More and more people are opting for a sustainable lifestyle – and that applies especially to young families. And those who value healthy living naturally ask discerning questions when deciding which flooring products to buy: Is their manufacture environmentally sound? What substances do they contain? Can they be recycled? The trend is clear: environmentally aware consumers are increasingly choosing to install modern, eco-friendly laminate floors.

## The Future of Living

Laminate is the ideal flooring for green buildings. These houses of the future are characterised by highly efficient use of resources such as energy, water and materials. One of their most important requirements is the use of environmentally friendly laminate floors, which pose absolutely no health hazards. Like those made by KRONOTEX GMBH & CO. KG.

## Laminate Floors – Inspired by Nature

The innovative laminate floors offered by KRONOTEX are as fascinating and diverse as nature itself. Whether consumers prefer perfectly replicated wood grain or authentic stone structures, there’s plenty to choose from: 10 collections and 168 decors make sure users get the best possible laminate floor for every setting and requirement. And KRONOTEX laminate floors are of course available with high-gloss surfaces as well as acoustically insulating underlays to optimally attenuate footfall sound and other noise.

Made in  Germany

KRONOTEX is a successful, independent profit centre operating at the Heiligengrabe, Germany site of the globally active SWISS KRONO GROUP.

Laminate Floors from KRONOTEX – Quality for Healthy Living

## KRONOTEX Guarantees More

KRONOTEX product guarantees go considerably beyond the legally required minimum. We also grant extended guarantees of the abrasion resistance of KRONOTEX laminate floors – when installed in private homes, for up to 30 years.

All guarantee terms and benefits in detail:

## Choose Laminate Floors from KRONOTEX

German engineering know-how is in great demand around the world.

The innovative expertise and outstanding energy balance sheets of KRONOTEX are about as good as it gets. It's therefore no coincidence that we now rank amongst the leading firms in use of modern technologies. It is an undisputed fact that KRONOTEX laminate floors are not only environmentally sound and sustainable, but also extremely healthy and user-friendly.

How could it be otherwise: growing numbers of health- and environmentally minded customers are opting for laminates, and especially laminate flooring from KRONOTEX!

## The Benefits of Laminate

- + KRONOTEX laminate flooring predominantly consists of a renewable raw material: wood from sustainably managed forests.
- + Laminate floors are ideal for children's bedrooms, as they don't contain any plasticisers (phthalates). The German consumer magazine Ökotest even explicitly recommends them.
- + A 30-year guarantee is granted on KRONOTEX laminate floors installed in homes.
- + Because laminate is installed without nailing or gluing (as floating floors), no adhesive residues result.
- + Innovative embossing processes are used to give the surfaces of modern KRONOTEX laminate floors authentic-looking wood grain and stone structures.
- + Laminate flooring doesn't contain any diethylhexyl phthalate (DEHP) and therefore can't cause any changes in hormone levels.
- + At the end of the product lifecycle, laminate flooring can be unproblematically disposed of or burnt as fuel.
- + KRONOTEX uses the scrap resulting from the production of laminate flooring as fuel.
- + KRONOTEX Laminate Flooring - Qualität Made in Germany

As one of the world's leading makers of laminate flooring, KRONOTEX offers you not only an innovative, top-quality product. We also consistently support you with our dense transport and distribution network and competent service.

We'll be happy to answer all questions you may have about KRONOTEX laminate floors.
